

# ICARUS HEAD EDITOR™ TOOL

## CREATE CUSTOM HEADS

### Select Icarus Head Editor™ Features:

- Designers work with shared libraries of heads
- Editor can be configured to work with any number of elements to fit the needs of any project
- Automatically generates encoded data that can be published into a database

### Customizable Features Include:

- Hair Style
- Hair Color
- Eye Color
- Tattoos
- Face Paint
- Scars
- Skin Color Variations
- Head Piercings in Various Locations
- Age Layers to Add Wrinkles to Any Skin Texture
- Variable Facial Hair Models and Colors  
*(including multiple layers of stubble)*

The Icarus Head Editor™ allows the creation of custom heads through the use of a simple graphical user interface. Millions of different heads can be created, each with only a few minutes work, by varying features such as skin color, hair cut, piercings, facial hair, makeup, and stubble. Additional elements can be easily added to fit any project. Once a head is created, the Icarus Head Editor™ generates encoded data that can then be published to a database, such as the Icarus Base Editor™, making it extremely simple for heads to be used with characters in the world. Icarus Head Editor™ allows designers to quickly give any character a unique appearance with customized heads.
